

Site O' the Month

<http://AREA.autodesk.com>

this is one of my fav sites. Links to art portfolios, tutorials, movies, and so much more. From the company that brought you 3dsMAX and *Bought* you MAYA, professional level 3d animation software, comes this site for anyone who has ever been interested in CG (Computer Graphics). Free Membership, no strings attached! 8/10 (8 because they need to update more often.)
